Shop top class 24k Golden Arowana fish for sale at [Arowanaz.org](http://Arowanaz.org)—your relied on supply for ethically bred, CITES-certified specimens.

### The Arowana: A Living Fossil with Timeless Appeal

Arowanas (Osteoglossiformes) are in many instances known as “living fossils” because of their prehistoric lineage dating lower back over 140 million years. These iconic fish resemble miniature dragons, with elongated our bodies, barbels, and iridescent scales that glint like worthy metals. Among the rarest and most coveted types is the 24k Golden Arowana—a subspecies of the Asian Arowana (*Scleropages formosus*) prized for its extraordinary gold hue.

### Taxonomy & Evolutionary History

The 24k Golden Arowana belongs to the Asian Arowana (*Scleropages formosus*), a species categorised under:

Kingdom: Animalia

Phylum: Chordata

Class: Actinopterygii (Ray-finned Fish)

Order: Osteoglossiformes (Bony-Tongued Fish)

Family: Osteoglossidae

Genus: *Scleropages*

Species: *formosus*

Asian Arowanas diverged from different osteoglossids throughout the Cretaceous era, keeping primitive tendencies like a bony tongue and air-respiratory skill. Their close kin embrace the Silver Arowana (*Osteoglossum bicirrhosum*) and Jardini Arowana (*Scleropages jardinii*), but the 24k Golden stands proud for its genetic predisposition to intense gold pigmentation.

### Physical Characteristics: Why the 24k Golden Stands Out

The 24k Golden Arowana earns its call from its steel gold scales that replicate mild like pure gold. Key trends embrace:

Size: Reaches 24–36 inches in captivity (wild specimens grow large).

Color: Uniform gold with diffused iridescence; uncommon “brilliant grade” variations show deeper, greater brilliant tones.

Barbels: Two whisker-like appendages close the mouth used for sensing prey.

Sexual Dimorphism: Males expand longer dorsal fins and broader heads during breeding season.

Unlike albino or platinum morphs, the 24k Golden’s gold pigment is genetically good, making it a prized collector’s item.

### Habitat & Natural Distribution

Wild 24k Golden Arowanas inhabit tropical river systems in Southeast Asia, consisting of the Mekong, Sumatra, and Borneo. They thrive in:

Water Temperature: 28–30°C (eighty two–86°F)

pH: 6.5–7.5 (a bit acidic to neutral)

Dissolved Oxygen: High tiers (owing to flowing waters)

Substrate: Soft sand or mud with submerged vegetation.

In captivity, replicating these situations is integral, see our Arowana Tank Setup Guide for main points.

Aquarium Care: Keeping Your 24k Golden Thriving

Tank Requirements

Minimum Size: 500+ gallons (for adults); juveniles desire 2 hundred+ gallons.

Filtration: Canister filters + sump programs to retain pristine water.

Water Flow: Strong currents mimicking river rapids.

Decor: Driftwood, rocks, and floating vegetation (prevent sharp edges).

Water Chemistry

Parameter Ideal Range

Temperature 28–30°C (82–86°F)

pH 6.5–7.5

Ammonia/Nitrites 0 ppm

Nitrates <20 ppm

Feeding

Feed a mixture of are living/frozen meals (shrimp, crickets, silverfish) and first-class pellets. Juveniles require every single day feedings; adults eat 2–three times weekly. Avoid overfeeding to stop weight problems.

Tankmates

Compatible with monstrous, non violent fish like:

Other Arowanas (same dimension)

Catfish (e.g., Plecostomus)

Large Barbs (e.g., Tinfoil Barb)

Avoid small fish—they'll be eaten!

Breeding & Reproductive Challenges

24k Golden Arowanas are mouthbrooders: Females lay eggs in nests, then elevate [Buy Silver Arowana Fish Online](#) them in their mouths for 50–60 days except hatching. Captive breeding is problematic using:

Gender Identification: Hard to differentiate men/adult females till adulthood.

Space Needs: Pairs require 1,000+ gallon tanks.

Low Success Rates: Only 10–15% of spawns end in achievable fry.

For stepped forward breeders, Arowanaz.org's Master Breeding Guide bargains professional methods.

 Legal & Conservation: Protecting a Precious Resource

The Asian Arowana (which includes 24k Goldens) is indexed beneath CITES Appendix I, that means worldwide industry is closely restricted. To legally personal one:

Obtain a CITES permit from your regional natural world company.

Purchase from licensed breeders (like Arowanaz.org) with microchip verification.
